Trismegistos Places,
a geographical index for all Latin inscriptions

Herbert Verreth
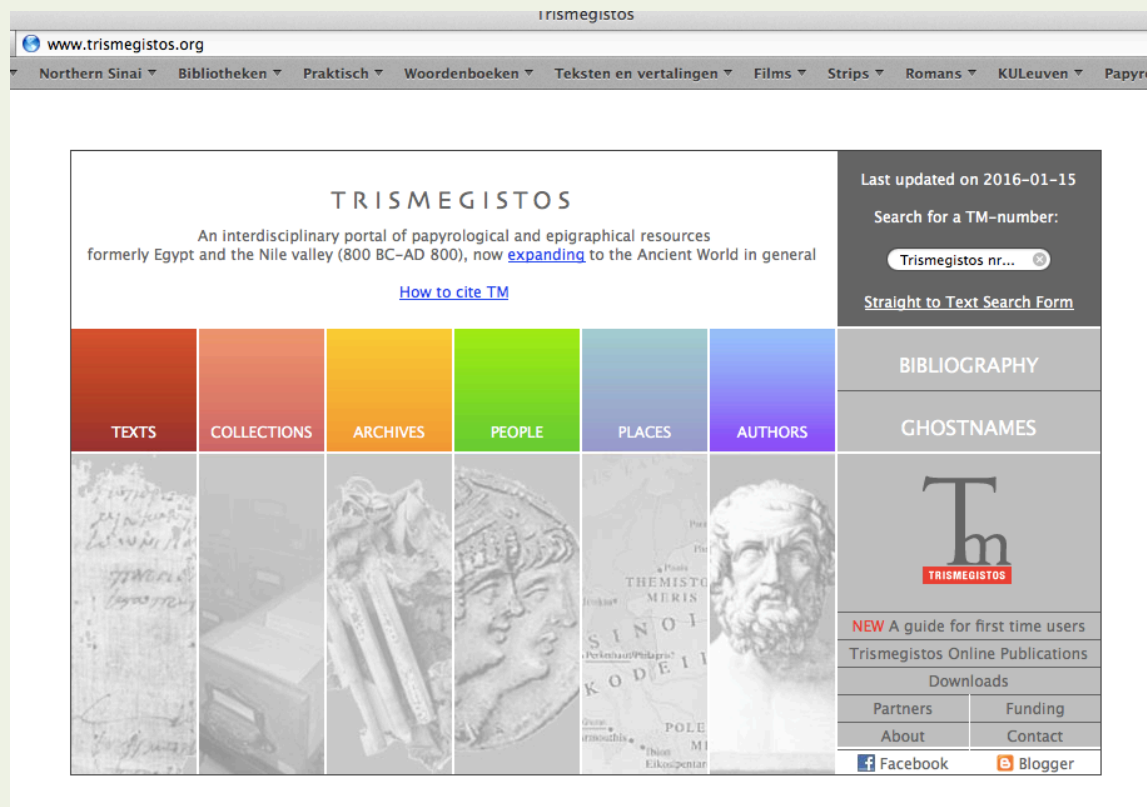

Trismegistos project

KU Leuven

Belgium

Herbert.Verreth@arts.kuleuven.be

Trismegistos (www.trismegistos.org):

- 618.814 texts, 439.857 of them (partially) in Latin
    EAGLE (EDH, EDR, HEp, EDB) & EDCS

- a relational database created with Filemaker (version Pro 14.0.1)

- an online MySQL / PHP environment

NAMED-ENTITY RECOGNITION [NER]

Papyrological documents

> a PHP environment to tag all words starting with a capital [2010-]
by Jeroen Clarysse

> done on the texts ca. 2009 available in the Papyrological Navigator
(http://www.papyri.info)

Latin inscriptions

> a Filemaker environment to tag all words starting with a capital
[2014-] by Mark Depauw

> tested on the texts ca. 2013 available in the Epigraphik-Datenbank
Clauss-Slaby (http://www.manfredclauss.de)

CAPITAL CLUSTERS

e.g.
- Quintus Caecilius Quinti filius Quirina Mustacus (TM 332260)
- Caio Annioleno Cai filio Arnensi Karthaginiensi Galliano (TM 349961)
- Maesiaes Cai libertae Chrysidis (TM 244384)

also other words starting with a capital were found :
- mere nouns at the beginning of an inscription
- names of gods, religious festivals, months, army units, ships, animals, mythological persons, Roman numbers
- imperial titulature

> 895.412 capital cluster cards

TAGGING OF THE CAPITAL CLUSTERS

e.g.

Caio Annioleno Cai filio Arnensi Karthaginiensi Galliano
dat   dat   gen filius tribus   origo   dat

Text without brackets `|Caio |Annioleno |Cai |filio |Arnensi |Karthaginiensi |Galliano flamini divi |Titi civitas |Uccula decreto |Afrorum posuit`

TM_provenance `Tunisia, Africa - Uccula`

TM_century

Edwin

EDCS province `Africa proconsularis`

comment

EDCS place `Henchir Durat / Uccula`

two groups:
(1) 'yes', this card contains a personal name [450.338]
(2) 'no', this card does not contain a personal name [445.074]

Within the second group also other labels have been added, e.g.
- army [23.183]
- god [16.030]
- emperor [42.930]

Geographical corpus:
- Egypt
- EAGLE provenances
- *Itinerarium provinciarum Antonini Augusti* [3.434 entries]
- *Tabula Peutingeriana* [3.287 entries]

> 46.693 toponyms from all over Egypt, the Roman empire and beyond

Automatic matching?
- toponyms resembling personal names
    e.g. Claudia, Florentia, Venusia, (Fundus) Bassianus
- difficult strings
    e.g. Colonia Ulpia Traiana Augusta Fidelis Lepcis Magna (TM 198383)
          Municipium Augustum Hipponiensium Regiorum (TM 200133)

So we had to do it manually...

> 60.998 capital clusters with at least one toponym

> 80 to 90 % of the toponyms occurring in all Latin inscriptions?

Phase 1: the identification of toponyms in the capital cluster strings
January - July 2015

Phase 2, the incorporation of the capital cluster file into the 'real' TM Georef file
more or less finished in January 2016

Phase 3: the context of the toponym
just getting started

- toponyms existing out of several consecutive elements are automatically grouped on one card
- 'Bithynia et Pontus' e.g. has to be joined manually

TM Georef on 21.01.2016:
- 67.693 geographical references attested in Latin documentary texts
- 10.474 geographical references attested in Latin literary texts

Total Latin: 78.167 (almost 40 % of the total of 196.878 Georef cards)

comparing the texts of our partners

automatical matching?   >   human observation...

also online linking to the texts of our partners?

Notes:	

The text below has been scraped from the Papyrological Navigator and may be outdated. The TM Places line numbers, which often correspond to the (paper) publication, may differ from those used in the PN.
Please click on the PN-button below to see the most up-to-date DDbDP text and other PN information. ALL examples of the declined form of this GEOREF will be highlighted there. This link will open in a new window.

PN

Θέων. ἀναγέγραπται ἐν τῶι ἐν Μέμφει Ἀνουβιείωι (ἔτους) ιγ Μεσωρὴ κε.

- spelling variants
    (1) the name as it occurs on the stone
        e.g. T(h)ra[c(um)] >Tra[c(um)]
        e.g. Rom(a)e > Rome

    (2) the standardized nominative case
        e.g. Trax
        e.g. Roma

- obsolete readings

- a reference to the most authoritative edition

- the date

- the context, the administrative situation and the 'status'
